Re: John Lambert

To Whom It May Concern:

I write this letter to provide a strong professional reference for the expert witness services of John Lambert, PLS. I engaged John in a complex surveying and boundary dispute involving hundreds of acres of property in use as a 500-megawatt wind energy conversion plant. The dispute was complex and involved seven-figure liability potential for my client. John's research and diligent field work were instrumental in preparing our defense and understanding the genesis of the underlying discrepancies. John prepared a detailed and professional expert witness report which was invaluable to us in negotiating a walk-away settlement. We settled the case before depositions and before trial so I did not have the opportunity to see John testify. However, John presented his findings as part of the mediation and his presentation was compelling. I believe one of John's strengths is his ability to assume a neutral posture as the teacher, as opposed to a hired gun expert. I think his demeanor as an impartial witness would have been some of the best I have ever seen among retained experts. It certainly assisted us in settling the case when settlement did not seem possible. Finally, John is a pleasure to work with. He is punctual, pleasant and delivered excellent work product. I hope I get the opportunity to work with John again soon. I highly recommend him.

Very truly yours,

Brandee L. Caswell

Re: Castle Pines 86 Acres

Dear John:

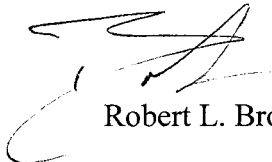

This is a note to thank you for the work that you recently performed for our client who was purchasing an approximately 86 acre parcel of property adjacent to Castle Pines. In addition to producing the survey on an accelerated timeframe and for a reasonable cost, I especially appreciated working with you for two other reasons.

First, you provided significant helpful information about the property beyond what was called for by the survey and you generally remained in very close contact with me as to survey-related matters in a closing that was difficult for a number of reasons.

Second, you took in stride that we told you to stop your survey work in mid-December and then, at the 11th Hour, just several days before year-end, asked you to produce and finalize the survey to permit a December 31st closing. You did so and exhibited what I would call grace under pressure.

Thank you again for your help. Best wishes for a happy and healthy new year.

Sincerely,

Robert L. Brown
